Accounts Statement

The financial year for Inayatiyya Healing UK starts from the 1 June 2025 to 31st May 2026.During this financial year, the total income from membership subscriptions, donations and course fees amounted to £2248.41 There is a healing retreat planned for this year and this has generated an initial income of £1000 and this amount is likely to increase.

Income generated exclusively from membership subscriptions increased to £1,753.41, compared to the last year's figure of £1,398.90. Also, there has been an increase in our expenditure to cover administrative costs, zoom costs, bookkeeping responsibilities as well as website costs. The total expenditure for staff and website costs was £2499.30. There was an expenditure of £2187 to cover venue hire cost for the retreat. Total expenditure this year outweighs total income generated from all activities.

We still hold the exceptional income of £900 from the Hope project last year and this amount needs to be donated back to the Hope project team. We are still waiting from payment request from the hope project team.

In terms of increasing future income, we need to be proactive in writing to all conductors and members to remind them to pay their monthly or yearly subscription fees. On a positive note, workshops and upcoming retreat can increase income for IH UK.

Also, we need to find a way to distinguish between donations for regular activities and payment for membership subscriptions as some donors make it clear via bank transfer reference whilst other donors do not specify this. We could write to all members to remind them to put a bank reference on all future payments.

Inayatiyya Healing UK's finance remains stable, and the upcoming retreat is expected to increase overall income. The final account balance in the HSBC bank account and PayPal account on the 31st of May 2026 was £7152.
